RE: Notice of Violation No. DE 87-N310

Greetings:

The following steps have been and are being taken to control spent grit and paint detritus from entering the Duwamish River during sandblasting activities on the marineway.

1. Enclose marineway sandblasting operations with tarpaulins or visquine barriers.
2. Extend the marineway floor to a point outside the normal tarpaulin or visquine barrier. Enclose the marineway floor from side to side below the dock level.
3. Pick up and remove for disposal spent grit and paint detritus to above the high water level each day as part of production operation.
4. Construct a berm at lower perimeter of marineway floor.

If you have any questions in this matter please contact the undersigned at (206) 767-4880.

Very truly yours,

DUWAMISH SHIPYARD, INC.
